Developing a Food Ordering Application using Zia in Zoho Creator

Aim

To create a food ordering application using Zia (the AI assistant) in Zoho Creator and to view its forms, reports, boards and dashboard.

Procedure

1. Sign in to Zoho Creator and click Create Application from the home page.
2. Choose the Zia (AI-assisted) option and describe the application: "Create a food ordering application with users, restaurants, menus, menu items, orders, order items, payments and delivery schedules."
3. Review the forms, fields and lookup relationships generated by Zia and create the application "Food Ordering Moon".
4. Open the application and verify the forms: Users, Restaurants, Menus, Menu Items, Orders, Order Items, Payments, Delivery Schedules and Order Tracking.
5. Add sample records to each form using the + (Add) button.
6. Open the auto-generated reports (Users, Menu Items, Orders, Order Items, Payments and Delivery Schedules) and verify the records.
7. Open the Board (Kanban) views to see Orders grouped by order status and Delivery Schedules grouped by delivery status.
8. Open the Dashboard page to view the summary tiles, Payment Status charts and Quick Links.
9. Capture screenshots of the reports, boards and dashboard as the output.

Output

The screenshot shows the 'Food Ordering Moon' application interface. The left sidebar contains navigation links: Dashboard, Orders, Menus, Order Items, Payments, Menu Items, Restaurants, Delivery Schedules, Users, and Order Tracking. The 'Users' section is expanded, showing a '+ Users' button and a 'Users Report' button. The main content area displays the 'Users Report' table, which lists 5 registered users. The table has columns for User ID, Name, Email, Phone, Address, and Created At. The data is as follows:

User ID	Name	Email	Phone	Address	Created At
