Create Portal User Using Zoho Creator

Aim

To create and configure portal user permissions in Zoho Creator to provide external users (patients) with controlled access to the Patient Appointment Management System.

Procedure

1 Open the Patient Appointment Management System application in Zoho Creator.

2 Navigate to Settings → Portal User Permissions.

3 Click **Add Permission** to create a new portal permission set.

4 Create the permission set `Patient Portal Viewer` with the description "View and manage own patient records, book appointments, and view appointment details".

5 Configure the module access for the portal users: Appointment Schedule, Doctor Availability, Doctor Profile, Patient Profile, Visit Record and Dashboard.

6 Set the view, edit and delete permissions for each module (for example, view-only access to Doctor Availability, Doctor Profile and Visit Record, and report-based access to Appointment Schedule and Patient Profile).

7 Click **Update** to save the permission set.

8 Verify that the permission sets (Insurance Coordinator, Patient, Customer and Patient Portal Viewer) are listed under Portal User Permissions.

Output

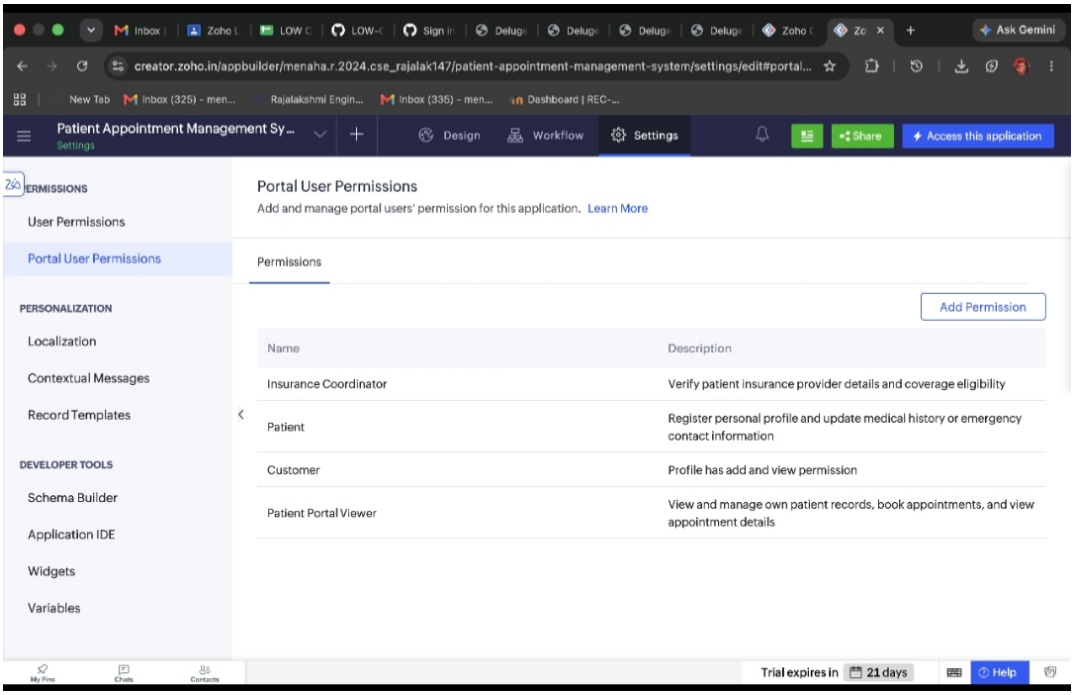

Fig 1: Portal User Permissions list

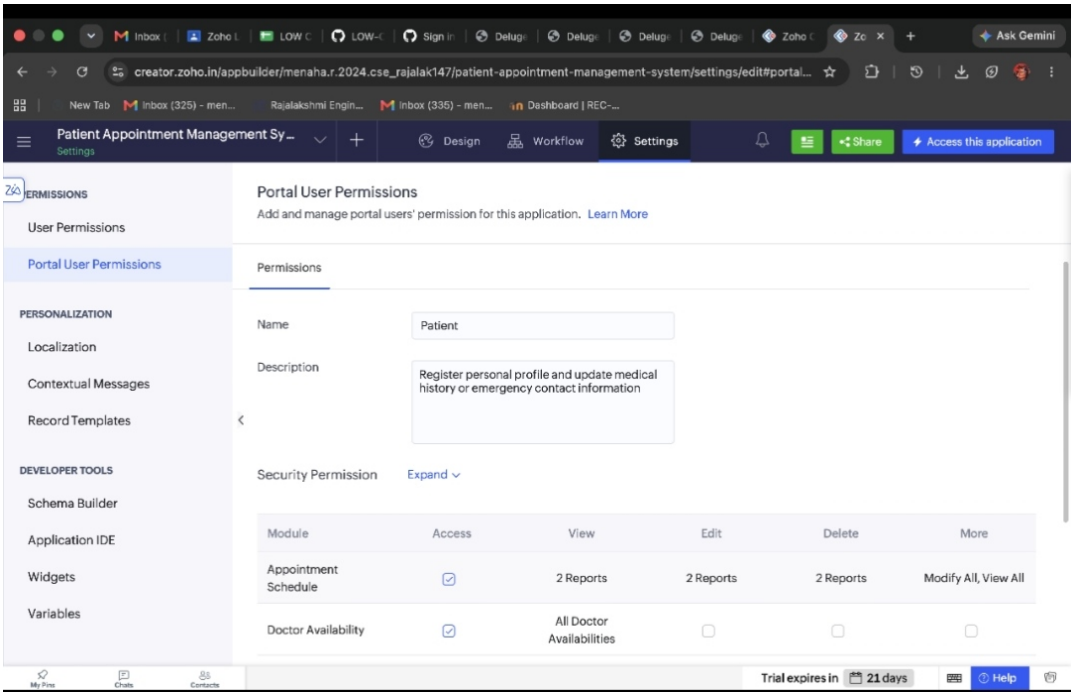

Fig 2: Patient portal permission – name, description and module access

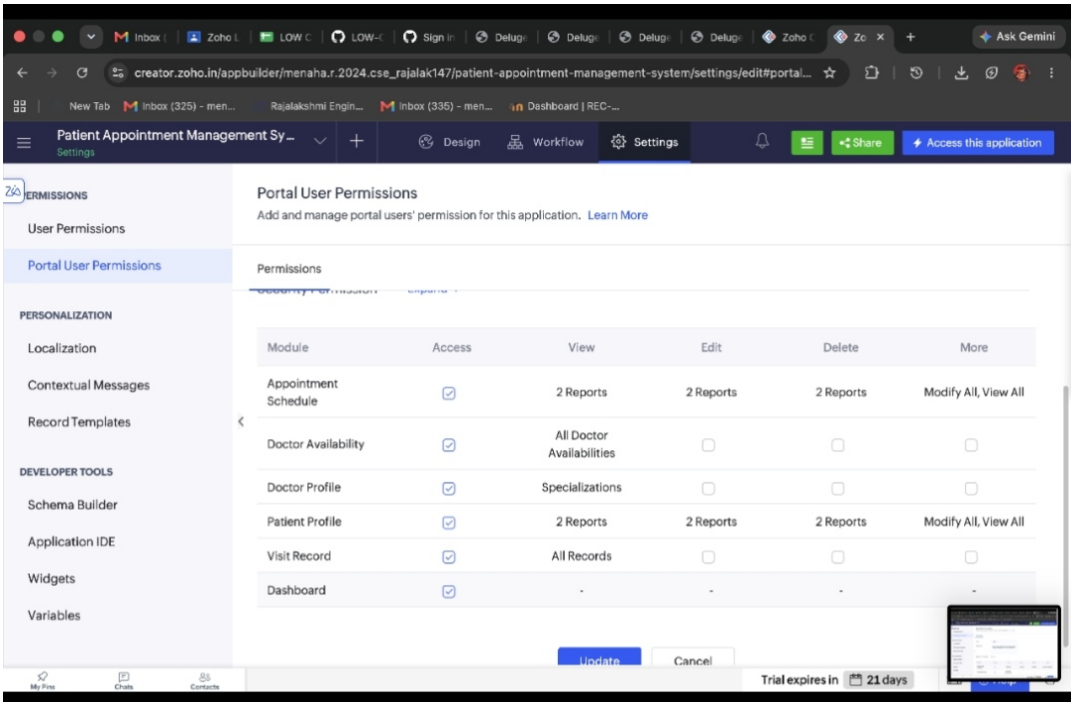

Fig 3: Module-wise access, view, edit and delete permissions

Result

Portal user permissions were created and configured in Zoho Creator to give patients controlled access to the Patient Appointment Management System.
