Create Workflow Using Zoho Creator

Aim

To create and implement workflows in Zoho Creator to automate activities in the Patient Appointment Management System.

Procedure

1 Open the Patient Appointment Management System application in Zoho Creator.

2 Navigate to Workflow → Form Workflows.

3 Configure workflows for forms such as Patient Profile, Appointment Schedule, Doctor Profile, Doctor Availability, and Visit Record.

4 Set appropriate form events, such as load of the form and validations on form submission, to trigger the workflows.

5 Create the Deluge script `Auto-Set Registration Date` on the Patient Profile form to automatically fill the registration date with the current date when the form loads.

6 Configure the workflow to run on the *Load of the form* event so that the registration date is set whenever a new patient record is opened.

7 Create the `Cancel_Duplicate_Booking` workflow on the Appointment Schedule form to validate the patient field and prevent duplicate appointment bookings on form submission.

8 Save and test the workflows.

Output

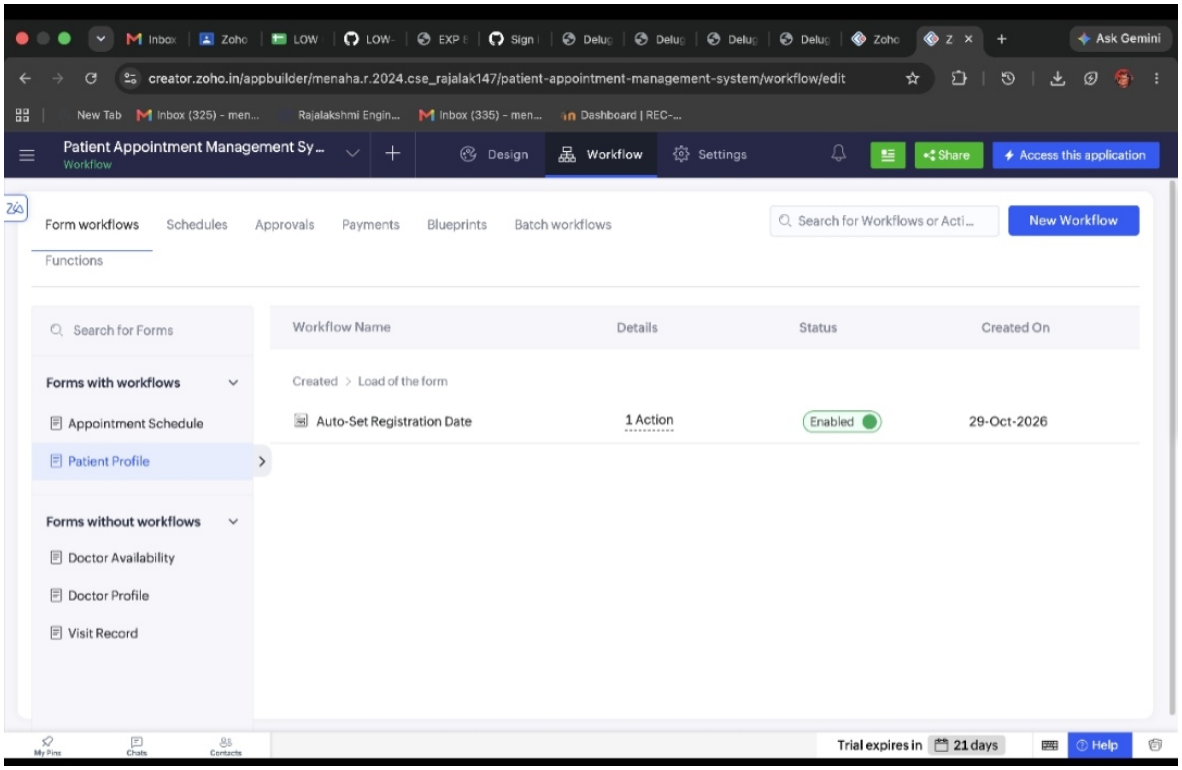

Fig 1: Form workflow list – Patient Profile (Auto-Set Registration Date)

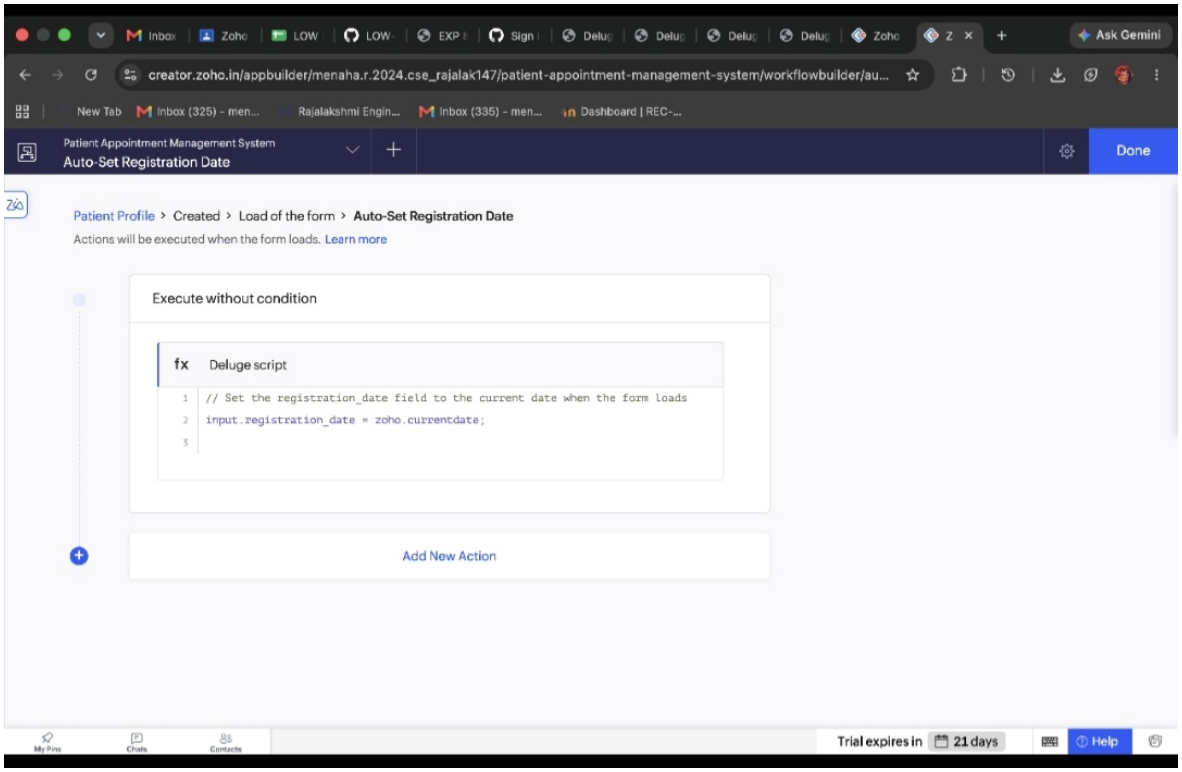

Fig 2: Deluge script for Auto-Set Registration Date

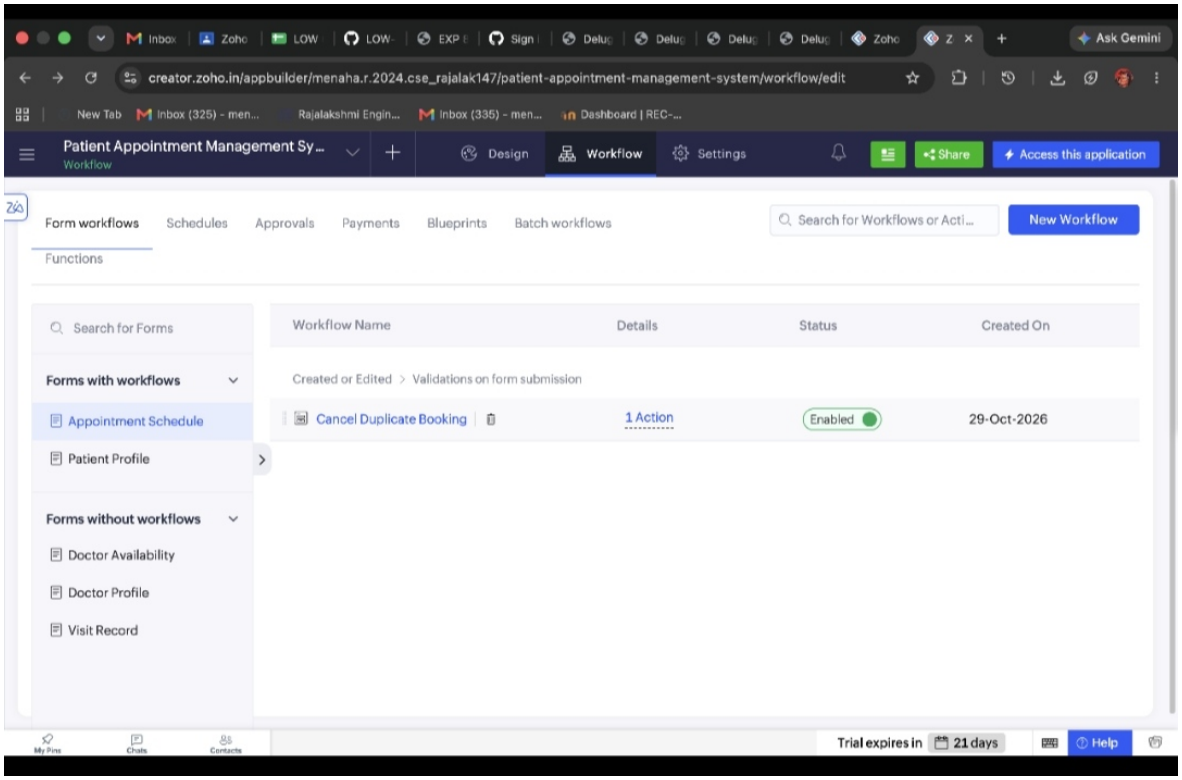

Fig 3: Form workflow list – Appointment Schedule (Cancel Duplicate Booking)

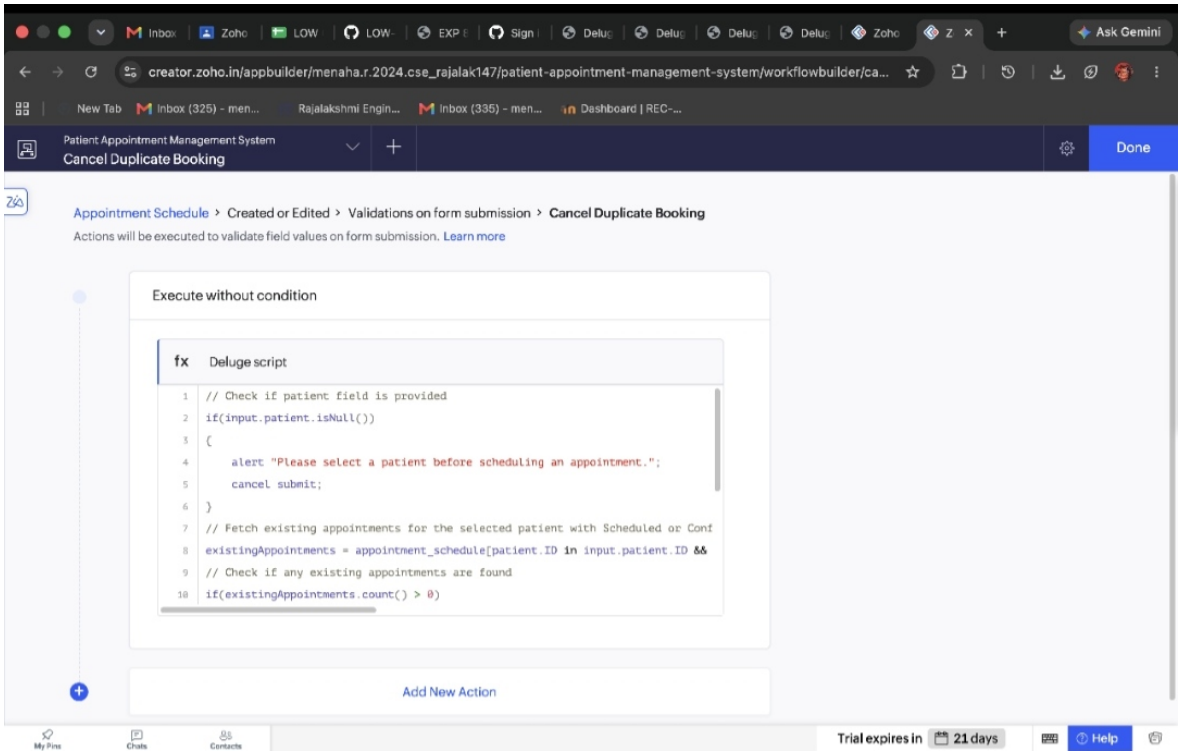

Fig 4: Deluge script for Cancel Duplicate Booking

Result

Form workflows were configured in Zoho Creator to automate registration-date entry and duplicate-booking validation in the Patient Appointment Management System.
